SUBJECT INDEX FOR VOLUME 26

adolescent health, and unemployment, 1025–1033

ageing, and social support, 737–749

AIDS, the United States perspective, 979–988

alternative health care, and midwifery, 1141–1158

alternative medicine, and patient beliefs, 685–689
and family practitioners, 853–861
in Canada, 1061–1072

anxiety, in early breast cancer, 583–585

asthma, 359–364

audiology training, in Nigeria, 1035–1047

Australia, religion and pregnancy in, 401–407

Bangladesh, cholera in, 5–13
family planning in, 597–604

Belgium, hospital admissions in, 91–100

blood pressure, and sex differences, 1019–1023

Brazil, health beliefs in, 793–802

breast feeding, and cognitive development, 635–639
among Indochinese in California, 1125–1132

Canada, and naturopathy, 1061–1072

cancer, and epidemiologic methods, 215–221
and breast surgery, 583–585
and patient coping, 625–633
comparative rates among religious sects, 1007–1017

child health, and immunization coverage in Nepal, 265–268
haemophilia and parental work dynamics, 467–475
and birth weight, 769

childhood mortality, in southern Peru, 253–258

child morbidity, and correlates, 701–713
accidents and family size, 839–843
in Jamaica, 1117–1124

child nutrition, and maternal employment in Panama, 605–612

chiropractice, and health care delivery, 785–792

community attitudes, and health, 1133–1139

community participation, and the prevention of accidents, 1087–1093

coping, and emotion, 309–317
patterns among cancer patients, 625–633

diagnosis-related groups, and research methods, 111–117

diagnostic technology, and cost-effectiveness, 715–725

diarrheal disease, patterns in Jakarta, 641–649

doctor–patient relationship, the case of the visually impaired and the blind, 393–399
during medical internship, 1095–1101

drug adoption, 1183–1189

drug use, its metaphorical nature, 417–424
and social factors in Sweden, 477–483

Egypt, ethnomedicine in, 651–657

emergency medical services, 163–171

epidemiology, and primary acute pancreatitis, 79–89
and Hodgkin's disease, *131–140*
and history among subarctic Indians, 659–671
changing patterns of disease in Papua New Guinea, 997–1006

Ethiopia, and schistosomiasis, 803–827

Finland, coffee use and the young, 259–264
sleep patterns in, 443–450

fluoridation, 451–462

gender, ethnicity and mental health services, 989–996
and blood pressure, 1019–1023

gender variation, and health promotion, 525–535

general practice, size and the economy of time in, 435–441

growth monitoring, 941–948

health beliefs, and health behaviour, 463–465
and child morbidity in Zaire, 701–713
and the social context, 793–802
in Zambia, 1159–1172
and nerves, 1197–1259

health care, and political economy in Namibia, 577–582
and the distribution of services in South Africa, 845–851

health care delivery, 179–186
and chiropractice, 785–792

health care planning, 141–151

health care policy, and interview surveys, 223–233

health care systems, 91–100, 179–186
and the public–private hospital dichotomy in New Zealand, 101–110

health care utilization, and community mental health
centres in New Zealand, 55–70
in a Medicaid population, 989–996

health economics, and family planning programme in
Bangladesh, 597–604
decision making in hospital
laboratories, 715–725
and priority settings, 919–929

health education, and nutrition campaigning, 173–178

health promotion, at the worksite, 491–501
and employee health, 491–543
and gender differences, 525–535
at the worksite, 551–558, 569–575
and corporate programmes, 559–567

helminthiasis, and socio-economic environment in
Panama, 209–213

Hodgkin's disease, 131–140

holistic health, and western medicine, 775–784
and family practitioners, 853–861

hospitalization, comparison between Belgium
and the Netherlands, 91–100

hypertension, stress and salt, 293–302

illness aetiology, and the social context, 793–802

immunization, coverage in semi-urban Nepal, 265–268

India, communicable diseases in, 15–24
dispensing patterns in, 691–699

Jamaica, family planning in, 619–623
and child morbidity, 1117–1124

kidney transplants, a game-theoretic approach, 1109–1116

leprosy, in West Nepal, 25–36
and social contacts in Sarawak, 1073–1077

life events, and post-traumatic stress disorder, 319–325

life-style, and cancer risk, 1007–1017

malaria, disease patterns in Jakarta, 641–649

maternal employment, and child nutrition, 605–612

maternal health, and social support, 1079–1085

medical education, and the evolution of dissatisfaction, 1095–1101
and social science in Nigeria, 1191–1196

medical geography, 1–199
and disease clusters, 215–221

medical history, ethno-ophthalmology in the Egyptian Delta, 651–657
and epidemiology transition among subarctic Indians, 659–671
dispensing practitioners in India and 19th century England, 691–699
and nerves, 1197–1259

medical statistics, a geographic regression model, 119–129
small-area variation in health-related data, 141–151

midwives, and alternative approaches, 1141–1158

migraine, and defense mechanisms, 343–350
and stress, 351–358

migrant health, and violent deaths in the United States, 269–276

migration, a morbidity, 49–54

morbidity, and migration, 49–54
variations in Jakarta, 641–649

Namibia, health care in, 577–582

natural lottery, community and health, 1133–1139

naturopathy, in Canada, 1061–1072

Nepal, leprosy control in, 25–36
and child immunization programmes, 265–268

nerves, in cross-cultural perspectives, 1197–1259

Netherlands, obstetric care in, 71–78
hospital admissions in, 91–100

New Zealand, and community mental health centres, 55–77
health care systems in, 101–110
stress among nurses in, 375–380
foreign medical graduates in, 1049–1060

Nigeria, audiology training in, 1035–1047
social science and medical education in, 1191–1196

nurses, autonomy and job satisfaction, 1103–1107

nursing, and stress, 375–380

nutrition, and health education, 173–178
patterns among the Indochinese in California, 1125–1132

obstetric care, in the Netherlands, 71–78

occupational health, 485–575, 1087–1093

Panama, and children's health, 209–213
maternal employment and child nutrition in, 605–612

Papua New Guinea, changing patterns of disease in, 997–1006

patients beliefs, and alternative medicine, 685–689

perceived health, and physician utilization, 829–838

Peru, childhood mortality among the Aymara, 253–258

pharmacies, and medical care, 409–416

physical disability, and social liminality, 235–242
the comparative treatment of visually impaired and blind patients, 393–399

pregnancy, and religion, 401–407
among adolescents in Africa, 727–735

primary acute pancreatitis, its epidemiology, 79–89

primary care utilization, contrasts in America and West Germany, 829–838

primary health care, and location–allocation models, 153–161
and the role of pharmacists, 409–424
and the quality of life, 425–434
877–977
in the Third World, 879–889

privatization, and residential care, 37–47

psychophysiology, and stress, 333–341

psychosomatic processes, and health, 327–332

public health reform, and private property in England 1830–1870, 187–199

regional development, and communicable diseases in rural India, 15–24

religion, and pregnancy outcome, 401–407

residential care, for the elderly, 37–47

schistosomiasis, in Ethiopia, 803–827

schizophrenia, as a problem of nerves. 1233–1243

sleep, and lifestyle in Finland, 443–450

smoking, and the female professions, 243–251
and life history correlates, 751–760

social deviance, and the rituals of adversity, 235–242

social factors, and leprosy and tuberculosis in Sarawak, 1073–1077

social networks, and support for the elderly, 737–749

social support, and occupational stress, 365–373
methodological issues in, 863–873

socio-economic environment, and child health, 209–213

South Africa, health needs and services in, 845–851

stress, 277–392
and hypertension, 293–302
and aerobic fitness, 303–307
and the sympathetic-adrenal medullary system, 333–341
and migraine, 351–358
and social support, 365–373
and popular ideas, 381–392

stress research, 279–291

sudden infant death syndrome, 587–595

surgery, and traditional medicine, 1175–1181

Sweden, psychotropic drug use in, 477–483
physicians' perspectives of work and the medical care system, 761–768

Third World, and primary health care, 879–889

torture, and indoctrination, 1173–1174

traditional medicine, and modern surgery, 1175–1181

Tuberculosis, and social contacts in Sarawak, 1073–1077

unemployment, and ill health among youths, 1025–1033

Vibrio cholerae 01, 5–13

violent death, and Lating American immigrants of the United States, 269–276

vocational choice, among medical, nursing and psychology students, 613–618

women's health, and living arrangements, 201–208
relationships between migraine and defense mechanisms, 343–350
and breast self-examination, 463–465
and family planning programmes, 619–623
and social power, 677–683
and social support among adolescent mothers, 1079–1085
1199–1208

Zaire, child morbidity in, 701–713
and hospitalization patterns, 949–955

Zambia, and health beliefs, 1159–1172
